

BASEL III – PILLAR 3 DISCLOSURE AS ON JUNE 30, 2025

Table DF – 2

CAPITAL ADEQUACY

Qualitative Disclosures:

A. A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities

In order to strengthen the capital base of banks in India, the Reserve Bank of India in April 1992 introduced capital adequacy measures in banks, based on the capital adequacy framework (Basel I) issued by Basel Committee on Banking Supervision (BCBS). Initially, the framework addressed capital for credit risk, which was subsequently amended to include capital for market risk as well and the Bank was compliant with regard to maintenance of minimum capital for credit and market risks.

Subsequently, the BCBS released the "International Convergence of Capital Measurement and Capital Standards: A Revised Framework" (popularly known as Basel II document) on June 26, 2004. Reserve Bank of India issued final guidelines on April 27, 2007 for implementation of the New Capital Adequacy (Basel II) Framework, which includes capital for Operational Risk. In line with the RBI guidelines, the Bank successfully migrated to the revised framework (Basel-II) from March 31, 2009.

Reserve Bank of India issued guidelines based on the Basel III reforms on capital regulation during May 2012, to the extent applicable to banks operating in India. The Basel III capital regulation has been implemented from April 01, 2013 in India in phases and it was decided originally to implement 'Capital Conservation Buffer Framework' fully from March 31, 2018. RBI issued detailed Guidelines on Composition of Capital Disclosure Requirements on May 28, 2013.

RBI had issued circulars on various dates extending the transitional period for full implementation of Basel III Capital Regulations due to the unfavorable economic situation and also due to the continuing stress on account of COVID - 19 crisis. Now the minimum regulatory requirement under Basel III with Capital Conservation Buffer (CCB) is 11.50% (9.00%+2.50%) with effect from October 01, 2021.

RBI has issued circular on "Prudential Guidelines on Capital Adequacy and Liquidity Standards – Amendments" on March 31, 2015. The Basel III Capital Regulations have been consolidated based on Master Circular – Basel III Capital Regulations vide circular No. DOR.CAP.REC.2/21.06.201/2025-26 dated April 01, 2025.

Under the Basel II framework, the total regulatory capital comprises Tier I (core capital) and Tier II capital (supplementary capital). In order to improve the quality of regulatory capital, the capital will predominantly consist of Common Equity Tier1 (CET1) under Basel III. Non-equity Tier 1 and Tier 2 capital would continue to form part of regulatory capital subject to eligibility criteria as laid down in Basel III. The Basel III capital regulations continue to be based on three-mutually reinforcing Pillars, viz. Minimum Capital Requirements (Pillar 1), Supervisory Review of Capital Adequacy (Pillar 2) and Market Discipline (Pillar 3) of the Basel II Capital Adequacy framework.

The Basel III norms mainly seek to:

- Raise the quality of capital to ensure that the banks are capable of absorbing losses, both as going concern and as gone concern basis.
- Increase the risk coverage of the capital framework.
- Introduce leverage ratio to serve as a backstop to the risk-based capital measure.
- Raise the standards for the supervisory review process and public disclosures.

The macro prudential aspects of Basel III are largely enshrined in the capital buffers. Both the buffers i.e. the capital conservation buffer and the countercyclical buffer are intended to protect the banking sector from stressed situations and business cycles. Now, the capital conservation buffer is in force.

Minimum capital requirements under Basel III:

Under the Basel III Capital Regulations, banks are required to maintain a minimum Pillar 1 Capital (Tier I + Tier II) to Risk Weighted Assets Ratio (CRAR) of 9% on an on-going basis. Besides these minimum capital requirements, Basel III also provides for creation of Capital Conservation Buffer (CCB) and CounterCyclical Capital Buffer (CCCB).

As per the RBI guidelines mentioned, Capital ratios with full implementation of capital conservation buffer (CCB) of 2.50% is summarized below:

Capital Ratios (% to RWAs)	March 31, 2016 onwards	March 31, 2017 onwards	March 31, 2018 onwards	October 01, 2021 onwards
Minimum Common Equity Tier I (CET 1)	5.500	5.500	5.500	5.500
Capital Conservation Buffer (CCB)	0.625	1.250	1.875	2.500
Minimum CET 1 + CCB	6.125	6.750	7.375	8.000
Additional Tier I	1.500	1.500	1.500	1.500
Minimum Tier 1 Capital (excluding CCB)	7.000	7.000	7.000	7.000
Tier 2 Maximum allowed	2.000	2.000	2.000	2.000
Minimum Total Capital	9.000	9.000	9.000	9.000
Minimum Total Capital + CCB	9.625	10.250	10.875	11.500

B. The Bank's approach in assessment of capital adequacy:

The Bank is following Standardised Approach, Standardised Duration Approach and Basic Indicator Approach for measurement of capital charge in respect of credit risk, market risk and operational risk respectively. Further, RBI has informed the banks to get ready to migrate to the New Standardised Approach for calculation of Operational Risk vide 'Master Direction on Minimum Capital Requirements for Operational Risk' dated June 26, 2023. Based on the master direction circular on minimum capital requirement for Operational risk, RBI has called for submission of data for 31.03.2025 and the same has been submitted to RBI during June' 2025. Earlier the bank had submitted data for Mar' 2024. Based on the revised computation of capital charge, the operational risk has declined thereby reducing the Risk Weight Asset and enhancing the CRAR marginally. Besides computing CRAR under the Pillar I requirement, the Bank also undertakes stress testing periodically in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, profitability and capital adequacy. The bank conducts Internal Capital Adequacy Assessment Process (ICAAP) on an annual basis to assess the sufficiency of its capital funds to cover the risks specified under Pillar-I and Pillar-II of Basel guidelines. The adequacy of Bank's capital funds to meet the future business growth is being assessed in the ICAAP document.

C. Quantitative Disclosures:

(₹ in crore)

a	Capital requirements for Credit Risk: (@ 9.00% on Risk weighted Assets)		
	• Portfolios subject to Standardised Approach (35320.39 * 9.00%)		3178.83
	• Securitisation exposures		Nil
b	Capital requirements for Market Risk:		
	Standardised Duration Approach		14.80
	• Interest Rate Risk	3.26	
	• Equity risk	1.64	
	• Foreign exchange risk	9.90	
c	Capital requirements for Operational Risk:		
	Basic Indicator Approach (5431.12 * 8.00%)		434.49
Minimum capital required (a + b + c)			3628.12
d	Capital Conservation Buffer (CCB) at 2.50% (40936.45 * 2.50%)		1023.41
	Minimum Total Capital + CCB		4651.53
	Total Capital Funds available		9456.77
	Total Risk Weighted Assets		40936.44
e	Common Equity Tier I CRAR % (excluding CCB)		19.59%
	Capital Conservation Buffer		2.50%
	Tier I CRAR		22.09%
	Tier II CRAR		1.01%
	Total CRAR %		23.10%

D. Risk Exposure and Assessment:

Risk is an integral part of banking business in an ever dynamic environment, which is undergoing radical changes both on the technology front and product offerings. The main risks faced by the bank are credit risk, market risk and operational risk. The bank aims to achieve an optimum balance between risk and return to maximize shareholder value. The relevant information on the various categories of risks faced by the bank is given in the ensuing sections. This information is intended to give market participants a better idea on the risk profile and risk management practices of the bank.

The Bank has a comprehensive risk management system to address various risks and has set up an Integrated Risk Management Department (RMD), which is an independent operational department. Bank has a Risk Management Committee of Board (RMCB) functioning at apex level for formulating, implementing and reviewing bank's risk management measures pertaining to credit, market and operational risks. Apart from the Risk Management Committee of the Board at apex level, the Bank has a strong bank-wide risk management structure comprising of Risk Management Committee of Executives (RMCE) assisted by Asset Liability Management Committee (ALCO), Credit Risk Management Committee (CRMC) and Operational Risk Management

Committee (ORMC) at senior management level. Credit Risk Management Committee deals with credit policies and procedures, Asset Liability Management Committee deals with Asset Liability Management (ALM) and Integrated Treasury Policy of the Bank deals with both domestic and foreign treasury operations and Operational Risk Management Committee formulates policies and procedures for managing operational risks.

The Bank has formulated the following policies for mitigating the risk in various areas and monitoring the same:

- ✓ Integrated Risk Management Policy
- ✓ Loan Policy including MSME policy
- ✓ Credit Risk Management Policy
- ✓ Co-lending Policy
- ✓ Operational Risk Management Policy
- ✓ ALM Policy
- ✓ Integrated Treasury Policy
- ✓ Inspection and Audit policy
- ✓ KYC policy
- ✓ Risk Based Internal Audit Policy
- ✓ Stress Testing Policy
- ✓ Disclosure Policy
- ✓ ICAAP policy
- ✓ Credit Risk Mitigation & Collateral Management Policy
- ✓ Risk Rating Framework
- ✓ Pricing policy
- ✓ New Product Assessment Policy
- ✓ Risk & Control Self-Assessment standards (RCSA)
- ✓ Policy on Unhedged Foreign Currency exposures of corporates including SMEs
- ✓ Market Risk Management Policy
- ✓ Business Continuity Plan Policy
- ✓ Climate Risk Policy
- ✓ Fraud Risk Management Policy
- ✓ Model Risk Management Policy
- ✓ Digital Lending Policy

The structure and organization of Risk Management functions of the Bank is as follows:

Table DF – 3

CREDIT RISK: GENERAL DISCLOSURES

Credit Risk:

Credit Risk is a possibility of losses associated with diminution in the credit quality of borrowers or counterparties. In a bank's portfolio, Credit Risk arises mostly from lending activities of the bank, when a borrower is unable to meet its financial obligations emanating from potential changes in the credit quality / worthiness of the borrowers or counterparties.

Credit Risk Management encompasses a host of management techniques, which help the banks in mitigating the adverse impacts of credit risk. The objective of the Credit Risk Management is to identify measure, monitor and control credit risk by adopting suitable methodology.

The Bank has formulated Loan Policy which stipulates various prudential norms, benchmarks, guidelines for sanctioning of credits and recovery of the same. The Bank has also formulated a separate Credit Risk Management Policy, besides a Policy on Credit Risk Mitigation and Collateral Management.

Credit Risk is assessed by a robust internal credit risk rating system. Credit Risk Rating is the process wherein the merits and demerits of a borrower are captured and scorings assigned, which enables the Bank to take a view on the acceptability or otherwise of any credit proposal. Earlier the bank has been using its own internal rating models for rating of borrowers. The bank has started to rate the borrowers of exposures above Rs.50.00 lakh through ICRA Analytics Limited Rating Solution (IRS 3.0) which computes Probability of Default & Expected Loss of the borrower from last year.

We have digitized the lending process and making credit decisions through Newgen Software Technologies Limited for Retail loans & Corporate loans (MSME & Non-MSME) and use BCG scorecard for MSME lending. The bank also engaged few fintechs like scoreme, perfois (Credit Assessment Report), Hunter / Experian (Fraud Assessment of borrower), Legality (Digital signing and documentation) for specific purpose as mentioned.

Credit Risk Management Policy:

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Board. The Policy document defines organization structure, roles & responsibilities and the processes whereby the Credit Risk can be identified, quantified and managed. Credit Risk is monitored on a bank wide basis and the compliance with regard to the risk limits approved by the Credit Risk Management Committee (CRMC)/ Board and is being reviewed periodically.

The Bank adopts the definition of 'past due' and 'impaired credits' (for reporting purposes) as defined by Reserve Bank of India under Income Recognition, Asset Classification and provisioning (IRAC) norms (vide RBI Master Circular dated April 01, 2025).

Table DF – 4

CREDIT RISK

DISCLOSURES FOR PORTFOLIO SUBJECT TO THE STANDARDISED APPROACH

Qualitative Disclosures:

The Bank is accepting the ratings of the External Credit Rating Agencies approved by Reserve Bank of India, namely a) CRISIL, b) ICRA, c) CARE, d) India Ratings & Research Pvt Ltd, e) Acuite Ratings & Research Ltd and f) Infomerics Valuation and Rating Pvt. Ltd. to facilitate the corporate borrowers who enjoy credit facilities to get themselves rated. The corporates which are yet to get the approved ratings from these rating agencies are treated as 'unrated'.

The Bank computes risk weight on the basis of external rating assigned, both long-term and short-term, for the facilities availed by the borrowers. The external ratings assigned are generally facility specific. The Bank follows the below mentioned procedures as laid down in the Basel III guidelines for usage of external ratings:

- Rating assigned by one rating agency is used for all the types of claims on the borrowing entity.
- Long-term ratings are used for facilities with contractual maturity of one year & above.
- Short-term ratings are generally applied for facilities with contractual maturity of less than one year.

Quantitative Disclosures:

The exposures after risk mitigation as per Standardised Approach, (rated and unrated) in the following three major risk buckets, as well as, those that are deducted as per risk mitigation are given below.

(₹ in crore)

Risk Weight	Rated	Unrated	Total
Below 100 %	1594.21	43048.11	44642.32
At 100 %	519.96	16955.68	17475.64
More than 100 %	806.44	2326.60	3133.04
Total outstanding after mitigation	2920.61	62330.39	65251.00
Deducted (as per Risk Mitigation)	35.02	17959.76	17994.78

Table DF-17

LEVERAGE RATIO

Leverage ratio is a non-risk based measure of all exposures for the Tier-I capital. The leverage ratio is calibrated to act as a credible supplementary measure to the risk based capital requirements. The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage. Previously, the indicative benchmark Leverage Ratio prescribed was 4.50% (minimum), which has been reduced to 3.50% (minimum) as per the RBI circular on "Basel III Capital Regulations - Implementation of Leverage Ratio", vide DBR.BP.BC.No.49/21.06.201/2018-19 dated 28.06.2019.

$$\text{Leverage Ratio} = \text{Capital Measure (Tier I Capital)} / \text{Exposure Measure}$$
